

National Competence Centres for Social Innovation: Building-up and Consolidating the Capacity (ESF-SI-2023-NCC-01)

Objectives

Professionalisation and further development of NCCs that already exist or are being created in the Member States which participated in the 2020 call

Creation of NCCs in the Member States where they were not created under the 2020 call

Activities

Building and improving the professional capacities for supporting SI

Developing sustainable relationships, networks and synergies

Creating, developing and operating a resource centre and a hub for SI

Facilitating and supporting SI initiatives

Raising awareness and providing guidance and training in applying suitable tools, methods, and practices

Disseminating information on the available funding

Mobilising and empowering stakeholders to develop and improve policies and actions for supporting SI

NCC has been established and it has achieved most, if not all, of the following outputs:

It has built-up and consolidated professional capacities for supporting SI

It has consolidated its organisational structure, mission and governance

It has established a formal and sustainable partnership of several organisations sharing a common vision, tasks, and activities

It is recognised as a professional resource, partner and development hub

Members of a NCC are committed to participate in transnational activities and have established professional transnational working relations within their and other established consortium, the working group of NCCs

A national strategy and action plan to promote SI, including the support under ESF+, has been developed and presented

Outputs
